Hook & Plate Pool Covers

Pools are great to have, but in our current climate it is essential to have a pool cover to stop evaporation and to decrease your spend on pool chemicals.

Why Use a Hook & Plate Pool Cover?

Hook & Plate pool covers are a more cost effective alternative to the Popular Pole Pool Cover. It helps prevent evaporation which in turn can decrease your monthly spend on pool chemicals and electricity running your pump.

How Does It Work?

The Hook & Plate cover is fitted by means of Stainless steel plates being fitted into the coping around your pool. Hooks are attached around the pool cover with a rope system to easily adjust the length. The hooks slide into the plates and hold the cover in place. This cover works great for small to medium sized pools but can be difficult to operate due to weight on larger pools.

Why Use a Popular Canvas Pool Cover?

- Locally sourced Fabrics that last in the SA Sun
- Stainless steel products last longer
- Keeps the water temperature warmer
- All joins and hems are High frequency
- welded for a durable finish
- Keeps debris out of your pool
- Cost effective and safe

Benifits of a Hook & Plate Pool Cover

- **Easy to use**, The cover is easily unhooked and folded away.
- **Strong And Durable**, We use strong 550g - 600g PVC fabric along with Industrial strength Aluminium hooks and Plates
- We have a range of colours to suit you home or business.
- Reduces evaporation by up to 98%!
- Reduces chemical usage in the pool due to less evaporation and less algae from lower light penetration.
- Easily closes the pool over the winter months.
- Prevents debris from falling into the pool.

Our Hook and Plate Pool covers have a 12 month guarantee but can last in excess of 3-5 years when well maintained.

The Hook and Plate pool cover can become heavy as the size increases, resulting in more than 1 person needing to operate. For more information please contact our office.
